

## Question: What is alienWebcam and how does it work with my CCTV system?

**Answer:** alienWebcam is software that allows you to capture snapshot images from any camera channel and automatically upload them to the web for display on your company website.

### A fantastic, automated solution that does the hard work for you

#### How does it work?

alien webcam connects to DVRs, takes snapshot images and saves them on a PC or onto a website. This means companies can use the alienDVR to provide webcam pictures or even timed photo snapshots. alienWebcam also has a time-lapse feature which records snapshots of different times of the day and saves them locally. Third party software can then be used to create high speed video of a specified time period - often seen to depict flowers blooming or seasons changing.

#### Who uses it?

This software has been used to provide time-lapse images of buildings being constructed, traffic monitoring and even on a golf course to show website visitors the current conditions. Its great for providing promotional webcam images of any type of business online.

### alien Webcam

- Webcam & Timelapse Feature
- Very Flexible
- Single Channel or 16 Channel available
- Up Load Images to a Website
- Unlimited Uses

Product Code: **SOFT520**
